

**Postdoc opportunity in organ printing at UC San Diego**

We are hiring one or two outstanding postdocs to work on a highly interdisciplinary 3D liver bioprinting project. Expertise in bioprinting, biomaterials, vascular tissue engineering, or machine learning is needed. Knowledge in liver physiology/biology/pathology or experience with animal studies and surgical techniques will be a plus. The candidate will work within a large interdisciplinary team from bioengineering, medicine, and industry. The candidate must be able to work in a fast-paced environment. Primary work location will be in the Department of Chemical and Nano Engineering at UC San Diego.

To apply, please send your CV to Prof. Shaochen Chen at [shc064@ucsd.edu](mailto:shc064@ucsd.edu). Please indicate whether you have current authorization to work in the US.
